**Hustle and Float** - Rahaf Harfoush - 2019-02-19  
OUR CULTURE HAS BECOME OBSESSED WITH HUSTLING. As we struggle to keep up in a knowledge economy that never sleeps, we arm ourselves with life hacks, to-do lists, and an inbox-zero mentality, grasping at anything that will help us work faster, push harder, and produce more. There's just one problem: most of these solutions are making things worse. Creativity isn't produced on an assembly line, and endless hustle is ruining our mental and physical health while subtracting from our creative performance. Productivity and Creativity are not compatible; we are stuck between them, and like the opposite poles of a magnet, they are tearing us apart. When we're told to sleep more, meditate, and slow down, we nod our heads in agreement, yet seem incapable of applying this advice in our own lives. Why do we act against our creative best interests? WE HAVE FORGOTTEN HOW TO FLOAT. The answer lies in our history, culture, and biology. Instead of focusing on how we work, we must understand why we work—why we believe that what we do determines who we are. Hustle and Float

explores how our work culture creates contradictions between what we think we want and what we actually need, and points the way to a more humane, more sustainable, and, yes, more creative, way of working and living.

**Our Livable World** - Marc Schaus - 2020-10-13  
A vital guide to the frontlines of our fight against climate change and the scientific and technological innovations that will revolutionize the world. The United States' accelerated plans to combat the existential threat of climate change finally give reason to hope. In *Our Livable World*, research specialist and author Marc Schaus explores the incredible new green innovations in science and engineering that can allow us to avoid the worst repercussions of global warming as we work to usher in a sustainable, livable world. To beat a challenge the size of climate change, our solutions will have to be ambitious: solar thermal cells capable of storing energy long after the sun goes down, "smart highways" designed to charge your vehicle as you drive, indoor vertical farms automated to maximize crop growth with no pesticides, bioluminescent vines ready to one day replace our streetlights, jet fuel created from landfill trash—and next-generation carbon capture techniques to remove the emissions we have already released over the past several decades. Far from the geoengineering schemes of cli-fi action thrillers, real solutions are being developed, right this moment. *Our Livable World* features interviews with the innovators, real talk on the revolutionary technology, and a clear picture of a cleaner planet in the future. "An important book that shows the dawn of a new kind of environmental movement—an age where we invest in deeply creative and fascinating technical solutions that work in harmony with the Earth. Marc Schaus lays out the exciting future of environmental innovation before us." —Katie Patrick, author of *How to Save the World*

**Dreadnought** - April Daniels - 2016-01-24  
An action-packed series-starter perfect for fans of *The Heroine Complex* and *Not Your Sidekick*. "I didn't know how much I needed this brave, thrilling book until it rocked my world. *Dreadnought* is the superhero adventure we all need right now."—Charlie Jane Anders, author of *All the Birds in the Sky*  
Danny Tozer has a problem: she just inherited the powers of *Dreadnought*, the world's greatest superhero. Until *Dreadnought* fell out of the sky and died right in front of her, Danny was trying to keep people from finding out she's transgender. But before he expired, *Dreadnought* passed his mantle to her, and those secondhand superpowers transformed Danny's body into what she's always thought it should be. Now there's no hiding that she's a girl. It should be the happiest time of her life, but Danny's first weeks finally living in a body that fits her are more difficult and complicated than she could have imagined. Between her father's dangerous obsession with "curing" her girlhood, her best friend suddenly acting like he's entitled to date her, and her fellow superheroes arguing over her place in their ranks, Danny feels like she's in over her head. She doesn't have time to adjust.

Dreadnought's murderer—a cyborg named Utopia—still haunts the streets of New Port City, threatening destruction. If Danny can't sort through the confusion of coming out, master her powers, and stop Utopia in time, humanity faces extinction.

**The Bourbon King** - Bob Batchelor - 2019-09-03

The rise and fall of the man who cracked Prohibition to become one of the world's richest criminal masterminds—and helped inspire *The Great Gatsby*. Love, murder, political intrigue, mountains of cash, and rivers of bourbon...The tale of George Remus is a grand spectacle and a lens into the dark heart of Prohibition. Yes, Congress gave teeth to Prohibition in October, 1919, but the law didn't stop George Remus from amassing a fortune that would be worth billions of dollars today. As one Jazz Age journalist put it, "Remus was to bootlegging what Rockefeller was to oil." Author Bob Batchelor breathes life into the largest bootlegging operation in

America—greater than that of Al Capone—and a man considered the best criminal defense lawyer of his era. Remus bought an empire of distilleries on Kentucky's "Bourbon Trail" and used his other profession, as a pharmacist, to profit off legal loopholes. He spent millions bribing officials in the Harding Administration, and he created a roaring lifestyle that epitomized the Jazz Age over which he ruled. That is, before he came crashing down in one of the most sensational murder cases in American history: a cheating wife, the G-man who seduced her and put Remus in jail, and the plunder of a Bourbon Empire. Remus murdered his wife in cold-blood and then shocked a nation winning his freedom based on a condition he invented—temporary maniacal insanity. "The fantastic story of George Remus makes the rest of the "Roaring Twenties" look like the "Boring Twenties" in comparison."

—David Pietrusza, author of *1920: The Year of the Six Presidents*

**Shapo on the Law of Products Liability** - Marshall S. Shapo - 2012-10-22

A proliferation of lawsuits involving sport utility vehicles, defective tires, medical devices and drugs, and asbestos abounds. Public attention to products liability cases is at an all-time high, and awards routinely run into the millions of dollars. When developing a strategy in this high stakes

world, attorneys can't afford to have anything other than the best information and insight into this evolving area of law. Lawyers need practical tools to assess a products liability case's potential and build their approach, and Shapo on the Law of Products Liability provides the tools to give you the winning edge. Through a holistic analysis of the law and its principal developments as witnessed in hundreds of cases, this treatise gives litigators a wide variety of perspectives on potential strategies, and the tools to support those strategies with persuasive arguments. This authoritative two-volume work will enable you to: Assess products liability case potential and build sound litigation strategies Dig deep into products liability law to build creative approaches to litigation Craft a winning case and reap the greatest reward for your clients Find the tools and information to support strategies with persuasive arguments Both federal and state courts contribute a rich mix of decisions to products liability law, which covers both consumer products and occupational hazards. This indispensable resource for the products liability practitioner helps you prepare your case. Is the product defective? Who is liable? What is the manufacturer's responsibility? Who can be sued? What kind of awards may be realized? How might this be defended? Shapo on the Law of Products Liability also includes coverage of: Asbestos litigation Chinese drywall Food and drug Medical devices Design/manufacturing defects claims Punitive damages Discovery rule Up to date analysis and commentary History and background on products liability law Damages Advertising material Packaging Marshall S. Shapo, the Frederic P. Vose Professor at Northwestern University School of Law, is a nationally recognized authority on torts and products liability law.

**The More Economic Approach to EU Antitrust Law** - Anne C Witt - 2016-11-17

In the late 1990s, the European Commission embarked on a long process of introducing a 'more economic approach' to EU Antitrust law. One by one, it reviewed its approach to all three pillars of EU Antitrust Law, starting with Article 101 TFEU, moving on to EU merger control and concluding the process with Article 102 TFEU. Its aim was to make EU antitrust law more compatible with contemporary economic thinking. On the basis of an extensive empirical analysis of the Commission's main enforcement tools, this book establishes the changes that the more economic approach has made to the Commission's enforcement practice over the past fifteen years. It demonstrates that the more economic approach not only introduced modern

economic assessment tools to the Commission's analyses, but fundamentally changed the Commission's interpretation of the law. Emulating one of the key credos of the US Antitrust Revolution thirty years earlier, the Commission reinterpreted the EU antitrust rules as aiming at the enhancement of economic consumer welfare only, and amended its understanding of key legal concepts accordingly. This book argues that the Commission's new understanding of the law has many benefits. Its key principles are logical, translate well into workable legal concepts and promise a great degree of accuracy. However, it also has a number of serious drawbacks as it stands. Most worryingly, its revised interpretation of the law is to large extents incompatible with the case law of the European Court of Justice, which has not been swayed by the exclusive consumer welfare aim. This situation is undesirable from the point of view of legal certainty and the rule of law.

### **Free Prize Inside - Seth Godin - 2004-05-11**

How to find the soft innovation that will make your product, service, school, church, or career worth talking about. We live in an era of too much noise, too much clutter, too many choices, and too much spam. And as Seth Godin's 200,000-copy bestseller Purple Cow taught the business world, the old ways of marketing simply don't work anymore. The best way to sell anything these days is through word of mouth and the only real way to get word of mouth is to create something remarkable. Free Prize Inside, the sequel to Purple Cow, explains how to do just that. It's jammed with practical ideas you can use right now to make your product or service remarkable, so that it will virtually sell itself. Remember when cereal came with a free prize inside? Even if you already liked the cereal, it was the little plastic toy that made it irresistible. Godin explains how you can think of a bonus that will make your customers feel just as excited, no matter what business you're in. Consider these free prizes: • The Tupperware party, which turned buying plastic bowls into a social event • Flintstones vitamins, which turned a serious product into something fun • The free change-counting machine at every Commerce Bank branch • The little blue box from Tiffany, which makes people happy before they even open it This book offers a way to create free prizes quickly, cheaply, and reliably and persuade others in your organization to help you bring them to life.

World Bank Group - 2020-07-07

The COVID-19 pandemic has, with alarming speed, dealt a heavy blow to an already-weak global economy, which is expected to slide into its deepest recession since the second world war, despite unprecedented policy support. The global recession would be deeper if countries take longer to bring the pandemic under control, if financial stress triggers defaults, or if there are protracted effects on households and firms. Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems; greater exposure to international spillovers through trade, tourism, and commodity and financial markets; weaker macroeconomic frameworks; and more pervasive informality and poverty. Beyond the current steep economic contraction, the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence, human capital, and global value chains. Being mostly a reflection of the recent plunge in global energy demand, low oil prices are unlikely to provide much of a boost to global growth in the near term. While policymakers' immediate priorities are to address the health crisis and moderate the short-term economic losses, the

likely long-term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth, once the crisis abates. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, while the June edition contains shorter analytical pieces.
